

Specification & Installation Instructions

System's Minimum Requirements:

- Windows XP/Vista/7 (sorry, no Macs)
- Preferably a minimum of 2GB of memory

Installing Visualise2D is a very quick and straight-forward process requiring no more than one or possibly two minutes. However, if only your IT Support section is able to install software onto your computer, then please forward on this one page together with your e-mail with Registration Code to the relevant person.

FAQ: IT Support Section

Visualise2D is a Windows application downloaded and installed onto your computer exclusively from a link to a page on the Visualise2D website. Refer to an e-mail from Visualise2D for this link.

The installation process requires temporary administrator rights for the user account which is to have access to Visualise2D. The software will be tied to the account it is installed in and will ONLY be accessible to that single user account.

Once installed, a unique Registration Code activates the software providing access for when both off as well as online.

The above details are all included in an email issued following acceptance of a trial or purchase.

Procedure for Download & Install

- Login to the local User's account with full administrator rights
- Go to the link in the accompanying e-mail and follow the instructions provided
- When an input box is displayed, copy and paste in the Registration Code, also to be found in the e-mail
- On opening, the Online Image Manager will be displayed. Check that this works without hindrance from a firewall by selecting an image group followed by clicking on the Download button

General Notes

- The Registration Code can only be used once
- Only one installation is possible per user account
- Once installed Visualise2D cannot be accessed across user accounts including the one for administrator

Should you have any questions relating to your installation or operation of Visualise2D, or in the very unlikely event that you encounter a problem, please call 07773 765 805 or e-mail support [at] visualise2d.com
